

Welcome to our Public Exhibition

Thank you for taking the time to attend this public exhibition.

We are seeking your views on our preliminary plans for the re-designed Glenhead Solar Farm, located approximately 2.5km southwest of Limavady, which comprises up to 80MW of clean, low-cost solar generated electricity and an energy storage system of up to 100MW to help increase the flexibility and generation opportunities of the site.

We consider pre-application consultation a crucial part of the development process and we aim to engage early with the local community and key stakeholders in order to facilitate constructive consultation. This helps to identify issues and concerns, as well as benefits and opportunities, which we will consider when developing and refining the design and delivery of the proposal.

A range of information is shared, including details of the site location, design layout, proposed infrastructure, likely delivery route and environmental considerations.

The public exhibition forms part of our pre-application consultation and is designed to give you the opportunity to:

- learn more about the proposal
- discuss any questions or views with our project team
- provide written feedback to RES on the proposal.

Please take time to read the information provided and talk to our project team about any questions that you may have. All consultation feedback submitted to RES will be reviewed by the project team over the coming weeks as we continue the design process.
